"WE SELL ANYTHING ANYWHERE"

Why our 4½% is bigger than theirs.

That's the interest rate most banks pay on passbook savings. 4½%. And it's the most the law allows. So how can we pay more? Here's how. We do it by compounding your interest every day instead of every three months. Or every six months. The way many banks do. Fidelity's difference adds up to an effective yield of 4.6%. Which means more dollars to you at year's end.

Another thing. Your savings at Fidelity earn interest from the day you deposit 'till the day you withdraw. If you're banking somewhere else, chances are all you'll get is a "We're sorry" if you make an early withdrawal.

Stated simply, your passbook savings can't earn more than Fidelity pays.
Because we pay day by day.

SAFE DRIVING TIP

When driving at night, be extra careful. Always be sure that your lights are clean to aid visibility and make sure that your tail lights are clean so that you is reasonable distance from others.

What Do You See?

On June 21, 1972, the day of the flood, the picture above was taken of clouds in the sky and was brought into the TIMES-VIRGINIAN office by Miss Donna Woods of Appomattox.

Study the cloud formation and see if the same scene appears to you as we see it? Would be interested in comments.

Dinner Held In Brookneal
